PROFESSIONAL SUMMARY

I am a dedicated Software Engineer with a bachelor's degree in computer science and over 3 years of experience in full stack web development. My expertise spans Backend Engineering with Node.js, Data Analytics using Python, Database design, and Frontend development with React.

Recently, I completed a 3-month volunteer role as a Full Stack Developer at Devac.ca, a Canadian tech company, where I contributed to building scalable applications across the full stack. In addition, I am currently advancing my skills through hands-on training with the Programming Advices and Manara Tech platforms, focusing on cloud technologies (AWS), algorithms, and real-world software projects.

EXPERIENCE

FULL STUCK DEVELOPER
DEVAC.CA Inc
September 2024 – December 2025
Backend Engineering: NodeJS and database management.
Data Analytics: Python for data processing and analysis.
Frontend Engineering: React for responsive and dynamic user interfaces

Full Stack software Developer & Team Leader
QIT Company, Syria
January 2023 – June 2024
Developed and maintained websites and applications using HTML, CSS, JavaScript, and React.
Built and optimized back-end services with Node.js, Express.js, and MongoDB.
Collaborated with cross-functional teams to ensure timely and budget-compliant project delivery.

Office Assistant
Women's Center, Syria
January 2011 – December 2012
Coordinated meetings and organized office supplies

Assisted with data entry, document management, and customer service tasks.

Trainee
Manara Tech, Remote
April 2024 – Present
Developed effective communication and teamwork skills through collaborative projects.
Enhanced software problem-solving abilities by solving problems on Leetcode.
Acquired knowledge and practical experience with AWS, integrating cloud services into development workflows.

PROJECTS

Bank Management System (C++) *8 hours*

- Developed a console-based banking application implementing account creation, deposit/withdrawal, and transaction history features.
- Applied core OOP concepts and file handling to store client data persistently.

Word Guess Game (JavaScript, HTML, CSS) *2 days*

- Built an interactive word guessing game with dynamic inputs, color-coded feedback, and hint functionality.
- Enhanced skills in DOM manipulation, event handling, and UI/UX design.

To Do List Application (JavaScript, HTML, CSS) *3 hours*

- Created a simple task management app with add, complete, delete features.
- Used Local Storage for data persistence and improved front-end design and usability.

EDUCATION

September2020 - October 2023

Bachelor of Computer Science

American University of the People

CERTIFICATE

Software Engineering Specialization, Coursera, December 2024

AWS Certified Cloud Practitioner, AWS, August 2024

IBM Full Stack Software Developer, Coursera, July 2024

OOP as it Should Be, Programming Advices, June 2024

Algorithms & Problem-Solving, Programming Advices, May 2024

Applied Data Science, Coursera, June 2023

SAS Advanced Programmer, May 2023

Google Data Analytics, Coursera, January 2023

Google IT, Coursera, December 2022 Google

UX Design, Coursera, December 2022

Google Project Management, Coursera, June 2022

SKILLS

Programming Languages: C++, C#, Python, JavaScript (CSS, HTML)
Frameworks & Libraries: React, Node.js
Tools & Technologies: AWS, Git, GitHub, MySQL
Other Skills: Problem-solving, OOP, Debugging, Communication, Office

LANGUAGES

Arabic: Native

English: advanced

Turkish: intermediate

French: beginner
